

2026 Fall Physics Colloquia

일시 : 화요일, 17시

장소 : 아산이학관 433호

[09/15] 정호중(경희대학교) : Lithium Niobate photonic material for quantum communication and simulation

[09/22] 최현규(연세대학교) : Translational Mechanobiology in Immunology

[10/13] 이충만(연세대학교) : Light-induced targeting enables proteomics and manipulations on
endogenous condensates

[10/27] 강민구(서울대학교) : How a research field begins, spreads, and prospers: Lessons from Kagome metal

[11/03] 김재근(서울시립대학교) : Engineering Electronic Transport in Two-Dimensional Materials:
From Semiconductors to Superconductors

[11/10] 김태정(한양대학교) : Journey to discover our nature with the CMS detector at the LHC

[11/24] 조용훈(KAIST) : Controlling Classical and Quantum Light Using Semiconductor Nanophotonic Platforms

[12/01] 김기환(IBS트랩이온양자과학연구단) : Developing Trapped Ion Systems for Quantum Information Science
